

BALE WRAPPING

Silage wrap

07

Five-layer blown LLDPE stretch film for round and square bales. High cling and strong recovery pull it tight against the bale for an airtight, oxygen-free seal, and it resists punctures from coarse stalks.

25 µm
standard thickness

250–750 mm
roll width

1 500–1 800 m
roll length

> 1 year
UV stable outdoors

SPECIFICATIONS

Width	250, 375, 500 or 750 mm
Length	1 500 m or 1 800 m
Thickness	25 micron, or to order
Colours	White, black, light green, dark green, pink
Material	mLLDPE, LLDPE, LDPE
Packing	Roll in box, palletised

WHY FARMERS CHOOSE IT

- ✓ **Easy to wrap**
Consistent stretch and unwind on all common bale wrappers.
- ✓ **High tensile strength**
Strong stretch, tear and puncture resistance, even on stalky bales.
- ✓ **Airtight seal**
High cling locks the layers together for good fermentation.
- ✓ **UV stable**
Holds up for more than a year of outdoor storage.

Used for: Wrapping lucerne, grass, maize-stover and other forage bales for baleage and silage.
