

SILAGE AND GRAIN STORAGE

06

Silage bags & silage film

Five-layer co-extruded film made with imported raw materials for very high strength, puncture resistance and a long service life. Use black-and-white film to cover bunkers and silage pits, or silo bags to store silage and grain on the ground.

5-layer
co-extruded film

8–26 m
cover film width

9–12 ft
silo bag diameter

60–100 m
silo bag length

Cover film width	8–26 m
Length	Made to order
Colours	Black/white, green/white, milky white
Material	HDPE, 5-layer co-extrusion
Packing	Rolls, bagged

WHY FARMERS CHOOSE IT

- ✓ **Seals out air and water**
A tight, airtight cover for a clean, well-fermented silage.
- ✓ **Strong and puncture resistant**
High tear strength and elongation stand up to handling and weather.
- ✓ **White side out**
The white outer layer reflects sun and keeps the silage cooler.
- ✓ **Low minimum order**
Custom sizes and colours to fit your bunker or bagger.

Used for: Bunker and pit silage covers, silo bags for maize and grass silage, and on-farm grain storage.
