

CROP PROTECTION

Anti-insect net

09

Fine, even mesh woven from UV-stabilised polyethylene. It keeps insect pests off the crop while still letting light and air through, so you can cut back on pesticide sprays without overheating the tunnel.

60–120
mesh count

1–5 m
roll width

20–100 g/m²

Up to 10 m
joined width

SPECIFICATIONS

Mesh	60–120 mesh
Weight	20–100 g/m²
Width	1–5 m; joined up to 10 m
Material	PE with UV and anti-ageing agents
Weave	Sulzer, flat weave
Packing	Rolls

WHY FARMERS CHOOSE IT

- ✓ **Keeps pests out**
Blocks whitefly, aphids, moths and other insects from the crop.
- ✓ **Less spraying**
Physical protection means fewer pesticide applications.
- ✓ **Double-warp weave**
Durable, even mesh with high tensile strength and toughness.
- ✓ **Reinforced edges**
Tightly woven selvages that do not fray or pull loose.

Used for: Vegetable fields, orchards, tunnel side-walls and vents, greenhouses and nurseries.
