

Solenoid Valve (Motor Type)

24V AC (DC)

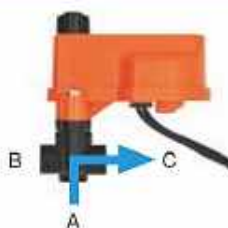

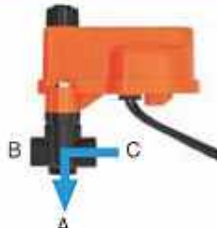

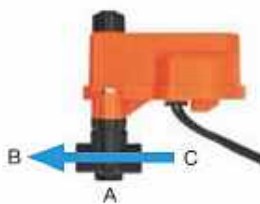

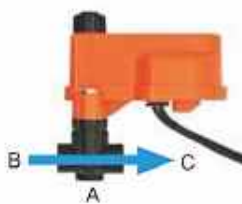

12V DC Latching

Technical Data

- AC (DC) version: Voltage 24V (18-30V), Current Inrush 250 mA, Holding 15 mA
- DC Latching version has red (positive) wire and black (negative) wire
- DC Latching version: Voltage 9-40V, Pulse width: 80-500ms
- Max. ambient temperature: 60°C (140 °F)
- Filtration: Min. 80 mesh
- With 100cm Wires
- Pressure range: 0-10bar (0-140 psi)
- Max. fluid temperature: 60°C (140 °F)
- Hydraulic ports connecting: 1/8" BSP
- Waterproof Rating: Ip68

How to Connect with Main Hydraulic Valve:

		Flowing Direction		
		NC (Normally Closed)	NO (Normally Open)	
De-energized		A: Pressure B: Vent C: Command		A: Vent B: Pressure C: Command
Energized		A: Pressure B: Vent C: Command		A: Vent B: Pressure C: Command

Note: NC & NO is referring to the Hydraulic valve. NC is hydraulic valve closing when de-energized, NO is hydraulic valve opening when de-energized.
