

DLHF400 horizontal hydraulic screen filter

SCREEN FILTER

Two-stage filtration through a coarse and a fine stainless-steel screen in a horizontal body. It removes silt, sand and scale, also handles water with a little organic matter, and suits main lines from 50 to 1 500 m³/h.

- Driven entirely by water pressure in the pipeline, so no external power is needed
- Fully automatic control
- Two-stage filtration with automatic backwash
- Parts: hydraulic piston, stainless-steel screens and suction nozzles

OPERATING PARAMETERS

Capacity per unit 50–1 500 m³/h	Filtration grade 20–2000 micron	Design pressure 1.0 MPa / 10 bar
Minimum pressure 0.2 MPa / 2 bar	Screen material Stainless steel 304 / 316	Control Pressure difference, timer or manual
Backwash time 10–200 s, adjustable	Working temperature up to 65 °C	Pressure loss ≤ 0.01 MPa / 0.1 bar
Backwash power Uses line pressure only, no external power
