Number of Sizes/Exits	Box Filling & weighing System	Inner Width
3-6	Manual or automatic	800mm, 1000mm, 1200mm

Jujube Lychee Sorting Weight Packing Line

- The modern jujube grading packing machine is composed of a hopper & inspection machine, a size grading machine, a box fill & weigh system and power box.
- Products are dumped to the hopper and transferred by the roller elevator to the inspection table for manual selection. Fruits get sorted on the roller-type grader by diameters and drop onto the takeout conveyor belt at each exit, which can automatically fill the box with a preset weight.
- All settings on the touch screen.
- ✓ Flexible & Customizable
- ✓ High efficiency
- ✓ Various speed
- ✓ Continuous processing
- ✓ Simple operation & maintenance
