

Product Features

Advanced MPPT+PID algorithms

MPPT efficiency up to 99%, resists sunlight and load fluctuations, enhancing operation stability

MPPT efficiency up to 99%

Real-time automatic tracking

AC/DC auto-switching function

Optional AC/DC switching module supports automatic AC/DC power supply switching for 24/7 uninterrupted operation

Support multiple types of pumps

High-performance vector control drive for synchronous/asynchronous pumps

User-defined intermittent operation & pump self-cleaning

Multiple pump protections

Pump dry run protection, full-water protection, low frequency protection, minimum power protection, lightning and surge protection, overcurrent protection, overheat protection, short-circuit protection, etc.

Automatic dormancy & wake up

Support automatic dormancy and wake up according to sunlight intensity
